

# LEEDS CHAMPIONSHIP SHOW 29<sup>TH</sup> JULY 2018

I would like to thank the exhibitors for a good entry in numbers, but I found the dogs very disappointing to many with upper arm problems, some straight some too short, they need to be back and equal to the length of the shoulder bone and set to a 90 degree angle, please watch the clubs DVD. I had too many bad front actions coming and going, not even single tracking. Also size needs to be watched, some are too big, the first word in the breed standard is small. You have great heads and coats but the breed is a working breed so construction needs to be right. Many need to exercise more to firm up the muscles in the hindquarters. There is a saying you are only as good as your bitches at the moment, don't lose it. Saying all of this, I do enjoy judging the breed which I have been around it for four decades. Also, thank you to my two stewards for keeping things moving and all the paperwork in good order.
